**Clean Air Power Limited
("Clean Air Power" or the "Group")**

Major Order from Sainsbury's for Genesis-EDGE Dual-Fuel™ product

Clean Air Power (AIM: CAP), the developer and global leader in Dual-Fuel engine management systems for heavy duty vehicles, is pleased to announce that it has received an order for 50 Genesis-EDGE, Dual-Fuel™ trucks from Sainsbury's.

The trucks will be fitted with Clean Air Power's Genesis-EDGE system at its facility in Leyland, UK and delivered to Sainsbury's during Q1 and early Q2 2014. The vehicles will form part of Sainsbury's large UK distribution fleet which already includes 49 Clean Air Power Genesis-EDGE trucks and 8 methane diesel installations following orders placed during 2012 and 2013.

John Pettitt, Chief Executive of Clean Air Power said:

"This is a very significant order for our Genesis-EDGE system and will bring the number of Clean Air Power Dual-Fuel vehicles operating in Sainsbury's UK distribution fleet to over 100. Following our recently announced orders for Dual Fuel systems and components this latest order gives me further confidence that the Company is on-course to meet market expectation in 2014. The demand we are seeing for our products is being driven by the increased supply of vehicles available to retrofit as a result of the high level of late Euro 5 vehicle purchases made at the end of 2013."

Notes to Editors**About Clean Air Power**

Clean Air Power is the developer and provider of Dual-Fuel™ combustion technology for heavy duty diesel engines. Dual-Fuel™ engines substantially cut fuel costs and carbon emissions without sacrificing the original engine's characteristic efficiency or reliability. Clean Air Power is well positioned to assist corporations and governments to deliver on their environmental commitments while at the same time reducing transport operators overheads.

Initially founded in the USA in 1991, around £50m has been invested in developing the technology with the result that 69 patents are currently held or pending. The holding company of the Group is based in Bermuda with operational subsidiaries in the UK, the USA and Australia. The Group was admitted to the AIM market of the London Stock Exchange in February 2006.
